

## **Excursion 1**

### **The Alps from a Munich perspective. An excursion to explore the relationship of a peri-Alpine metropolis with "its" mountains**

The field trip is related to the topic of the Forum Alpinum 2010 and especially to Plenary Session 1. On selected sites we will observe the new trend "back to the city" (reurbanisation), the history of urban sprawl (suburbanization), the rise of new service centres outside the agglomeration (post-suburbanisation) and the trends of ex-urbanisation and amenity migration. The route leads from Munich to Mittenwald, on the return there might be the possibility to visit a monastery and to make a coffee break.
